DETAILED ACTION

Priority

It is noted that this application appears to claim subject matter disclosed in prior Application No. 60/233,401, filed 18 September 2000. A reference to the prior application must be inserted as the first sentence of the specification of this application or in an application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e0 or 120. See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all nonprovisional applications. Also, the current status of all nonprovisional parent applications referenced should be included.

If the application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed claim for priority under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Commissioner may require additional information where there is a question whether the delay was unintentional. The petition should be directed to the Office of Petitions, Box DAC, Assistant Commissioner for Patents, Washington, DC 20231.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
 - Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Doillon et al. (USPN 5,863,984).

Regarding claim 6, Doillon et al. discloses a connective tissue construct, which comprises cultured fibroblasts (Column 11), in a biopolymer matrix (Column 3, Lines 27-31) where the biopolymer is collagen (Column 4, Lines 3-4).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 09/955,414

Art Unit: 3738

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

 Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stovall (WO 99/04720) in view of Doillon et al. (USPN 5,863,984).

Regarding claims 1-5, Stovall disclose a method for the repairing intervertebral discs (Page 8, Lines 1-3), where an opening is formed in the annulus fibrosis, a portion of the nucleus propulsus is removed (Page 10) and the bioremodelable (meaning that it is able to promote cell growth) suspension is integrated with the host tissue to close the hole in the annulus (Page 10-11). Stovall lack the teaching of the cultured connective tissue construct. Doillon et al. teach of a connective tissue construct, which comprises cultured fibroblasts (Column 11), in a biopolymer matrix (Column 3, Lines 27-31) where the biopolymer is the protein substance collagen (Column 4, Lines 3-4) to promote tissue ingrowth. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the invention of Stovall to have the method of intervertebral disc repair include the tissue construct, as taught by Doillon et al. for the promotion of tissue ingrowth.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Bell (USPN 4,485,096)- *Note*: Connective tissue construct

Norton et al. (USPN 6,110,210)- *Note*: insertion through the annulus fibrosis. Norton et al. (USPN 6,533,817)- *Note*: insertion through the annulus fibrosis.
